Professional Summary

Backend-focused Full-Stack Developer specializing in Python (FastAPI, Django) and AI-powered search systems. Experienced in scalable REST/Async APIs, RAG pipelines, pgvector vector/hybrid search, LLM integration, JWT authentication, OWASP security, and production-grade backend architectures.

Technical Skills

Languages: Python (Advanced), Java, JavaScript (Basic), SQL

Frameworks: FastAPI (async APIs, Pydantic), Django (Model View Template and Django Rest Framework)

Databases: PostgreSQL (pgvector, FTS, concurrency, transactions, indexing, views & materialized views, EXPLAIN ANALYZE, multitenant architecture, DB design, normalization, junction tables, ERD design, ACID compliance, JSON/JSONB), SQlite3 , Qdrant, MongoDB

AI / Search: RAG pipelines, Vector Embeddings, Semantic Search, LangChain, LLM integration, Hugging Face

Security: JWT/OAuth, OWASP Top 10, Rate Limiting, CSRF, Request Tracking, Custom Middlewares, Server & Frontend Headers Security

Tools / DevOps: Git, Docker (basics), KeyDB (caching), Celery, Railway, CI/CD concepts

Concepts: System Design, Async Programming, Scalable REST APIs, Microservices, REST Architecture

---

Professional Experience

Java Software Developer Intern

Analyze Infotech Pvt Ltd — Oct 2021 – Dec 2021

Cybersecurity Instructor

RR Group of Institutions — Aug 2024 – Dec 2024

- Taught 100+ students on Cybersecurity Essentials

Backend & AI Upskilling Period

Self-Directed Enhancement — Jan 2025 – Feb 2026

- Mastered Django ,FastAPI, RAG, Postgresql, LLM integration, system design , Database design and Organization , CI/CD Pipelining

• Built and deployed multiple production-grade projects on GitHub

---

Featured Projects :-

renting.ai – AI Semantic Rental Search (Ongoing)

github.com/shaanMS/renting.ai

• Engineered RAG-based natural language property search with vector embeddings and hybrid retrieval

• Integrated FastAPI, Qdrant vector DB, LangChain, LLM for intelligent responses

• Built ETL for Indian real-estate data with high localized relevance

Hungrio – Full Food Ordering Backend

github.com/shaanMS/Hungrio

• Developed complete backend: catalog, cart, secure checkout, Stripe payments, emails

• Implemented JWT + CAPTCHA auth, rate limiting, CSP/CORS, Celery tasks

• Deployed on Railway with PostgreSQL for scalability and security

Modern_Electricos – Advanced Django Patterns

github.com/shaanMS/Modern_Electricos

• Demonstrated modern Django architecture, clean patterns, reusable components

FTS_Search_Using_FastApi_Postgresql – Hybrid Search Engine

github.com/shaanMS/FTS_Search_Using_FastApi_Postgresql

• Built async hybrid search: pgvector semantic + GIN full-text + trigram tolerance

• Optimized for low latency and high throughput

and more projects available on GitHub (github.com/shaanMS)

Education

Master of Computer Applications (MCA) 2022 – 2024 76%

Dr. A.P.J. Abdul Kalam Technical University, Lucknow

Bachelor of Computer Applications (BCA) 2019 – 2022 72%

Chhatrapati Shahu Ji Maharaj University, Kanpur

Achievements & Languages

• Selected for Data Processing Role – NS Matrix Pvt Ltd (Dec 2023)
